

Refueler House Call: Case No. 08151-1

- Patient:** Two Aviation Refueler Trucks
- Location:** Venango Regional Airport: Franklin, PA
- Symptoms:** Inoperative Equipment & Maintenance Needs
-

Case History:

Findlay Aviation and Transportation Services (FATS) was contacted via telephone. The customer explained how he had been referred to FATS by another customer and was having numerous problems and issues with an Avgas Refueler Truck as well as a 5,000-gallon Aviation Refueler Truck. The customer requested an on-site service call on a specific date in order for FATS to conduct thorough inspections on each refueler truck and perform all necessary maintenance repairs.

Treatment:

A FATS service technician was dispatched to the customer's location at the Venango Regional Airport in Franklin, Pennsylvania. The FATS service technician spent two (2) days

fully inspecting and repairing each Aviation Refueler Truck. After a series of quality assurance tests, both Refueler Truck were once again fully operable and placed back into operations.

Duration of Treatment: 2 Days.

If you have Aviation Refueler Equipment that has been damaged or in need of repair, contact the aviation refueler repair and maintenance experts at Findlay Aviation and Transportation Services at:
